

2. Easy online order

PAN-collection box

Order your free PAN - collection box together with supplementary collection bags via our online form.

Just scan this QR-code or follow this link to get to the form.
<https://www.pan-biotech.de/pan-sammelbox>

PAN-collection bag

In case you already used the three included collection bags please order additional ones with the following form. You will receive them within the next few days.

As soon as the collection bag is filled with empty bottles you can arrange the collection.

3. How to arrange the collection

The collection of empty PET – cell culture bottles you can arrange at any weekday with our online form. For more sustainable usage we recommend the PAN – Collection Box to save several single box shipments.

With this QR-code you get to our online form.

Follow us on the green path

Dear PAN-Biotech customer,

For years we have focused on the quality of our products and services – always with the headline “Made in Germany”. We are producing all of our products exclusively in Aidenbach, Bavaria in accordance to ISO 9001 and ISO 13485.

This year we will increase our production capacity significantly. With the launch of our new production we will be able to offer you GMP compliant products.

In the past few months we have launched many activities and services to increase sustainability and environmental protection. To increase sustainability, for example we have already converted our company's car fleet to electronic cars. We have converted most of our company's car fleet from gasoline to 100% electric cars. Furthermore these cars are powered by our own produced solar energy.

As we received only positive feedback for our environmentally friendly disposal service for empty PET- cell culture bottles we will continue to expand our services. For this reason we developed two easy ways for the return of empty PET-cell culture bottles for our customers which we want to introduce to you in the following pages.

I personally want to encourage you to support our efforts for a more sustainable cell culture future.

Please help us! Together we can achieve a lot!

Best regards

Jens Hartmann

Owner and CEO
of PAN-Biotech GmbH

PS: Feel free to give me your ideas and suggestions personally:

1. You can choose between the following options

With our free PET- pick upservice we are taking all PET – cell culture bottles from all manufacturers and all sizes back to return them to a sustainable recycling circle. Our only requirement is that the bottles are free of any contamination and no non PET – cell culture bottles are returned.

Depending on the quantity of bottles you can choose between two recycling containers:

1. Possibility PAN-transport box

Picture 1: Use our transportation box to return your empty PET – cell culture bottles

2. Possibility PAN-collection box

Picture 2: PAN-collection box (dimensions: 40 x 40 x 100 cm)
